What is a Health Home?

A Health Home is not a physical space. It is a group of health and community agencies that have agreed to work together to help Medicaid members with serious and chronic health issues get additional support services and stay healthy & safe within their communities.

Each Health Home member will have a designated care manager to help them coordinate their care.

Do I have to change my doctors?

Health Homes should not interrupt your current health services, including your doctors or managed care plan.

What can my care manager help me with?

A care manager can help you stay healthy by assisting with:

Making and remembering appointments

Communicating between your doctors

Answering questions about your health care

A care manager can also help provide links to:

Housing, transportation & food

Health insurance

Medications

Who can join a Health Home?

Anyone who is **eligible for Medicaid** and has two chronic diseases such as diabetes, asthma, heart disease, high blood pressure, substance abuse or obesity, HIV/AIDS, or a chronic mental illness may be able to join.

If you are interested in receiving Health Home services or would like to refer someone, please contact our Care Management Partner:
